1. Company Overview

Nimbus Robotics was founded in 2014 in Lisbon, Portugal by Marta Oliveira and Dev Kapoor.

The company designs autonomous warehouse robots and currently employs 412 people across offices in Lisbon, Rotterdam and Austin.

Its flagship product line is called Atlas. The mission of the company is to make warehouses safer and more efficient for the people who work in them.

In 2023 Nimbus Robotics opened its second research centre in Rotterdam, focused on computer vision and fleet-coordination software.

The company is organised into four departments: Engineering, Operations, Sales and People.

2. Leave Policy

Every full-time employee receives 24 days of paid annual leave per calendar year.

Unused annual leave may be carried over to the next year, up to a maximum of 5 days. Carried-over days must be used by 31 March, otherwise they expire.

Employees are entitled to 10 paid sick days per year. A medical certificate is required for any sick absence longer than 3 consecutive days.

Parental leave is 18 weeks for each parent and may be taken in one block or split into two blocks within the first year after the child is born.

Leave requests should be submitted through the People portal at least 14 days in advance.

3. Remote Work and IT Security

Employees may work remotely up to 3 days per week, with the agreement of their manager.

When working outside the office, staff must connect through the company VPN, called Tunnel-X.

Passwords must be at least 14 characters long and must be rotated every 180 days. Password reuse across systems is not allowed.

Suspected phishing emails must be reported to security@nimbus-robotics.example within 1 hour of discovery. Do not click links or open attachments in suspicious messages.

Company laptops use full-disk encryption. Lost devices must be reported to IT immediately.

4. Travel and Expenses

During business travel the meal allowance is 25 euros per day.

Hotel stays are capped at 140 euros per night. Exceptions require written approval from the department head.

Expense reports must be submitted within 30 days of the end of the trip. Late reports may be rejected by Finance.

Any single purchase above 500 euros requires prior approval from the department head.

Economy class is the default for flights shorter than 6 hours.

5. Atlas-7 Product Specifications

The Atlas-7 warehouse robot has a maximum payload of 45 kg.

A fully charged battery lasts up to 6 hours of continuous operation. A full recharge takes 90 minutes.

The maximum travel speed is 2.2 metres per second, reduced automatically to 0.8 metres per second when people are detected within 3 metres.

The Atlas-7 is covered by a standard warranty of 36 months from the date of delivery.

Navigation uses a combination of lidar and stereo cameras and supports fleets of up to 200 robots per warehouse.
